Herausgeber Sebastian Lentz, Ute Wardenga

The logo for the Leibniz-Institut für Länderkunde (ifl) consists of the lowercase letters 'i', 'f', and 'l' in a stylized, outlined font. The 'i' and 'l' are tall and narrow, while the 'f' is shorter and wider, positioned between them. A small black square is located above the 'i'.

Heft 1

Marco Bontje and Joachim Burdack

**Economic poles in the European
metropolitan periphery and
sustainable development**

Leibniz-Institut für Länderkunde, Leipzig 2005

Table of contents

Marco Bontje and Joachim Burdack

Introduction **5**

Joachim Burdack

European metropolitan peripheries: a typology of new economic poles **9**

1	Introduction	9
2	The emergence of new economic clusters in the urban landscape: discourse and empirical evidence	9
3	Problems in analysing new economic clusters in European metropolitan peripheries	11
4	New Spatial clusters in a theoretical perspective	11
4.1	<i>New economic poles and agglomeration mechanisms</i>	11
4.2	<i>The emergence of new economic poles as a path dependent development</i>	14
4.3	<i>The institutionalisation of new economic poles as sub-regional units</i>	14
5	Towards typology of new economic poles in the metropolitan periphery	15
5.1	<i>Agglomeration mechanism: functional cluster vs. pure agglomeration</i>	15
5.2	<i>Stage of development: fully developed economic poles vs. potential economic poles</i>	16
5.3	<i>Organisational structure: established territorial unit vs. informal territorial unit</i>	17
5.4	<i>Locational setting: brownfield vs. greenfield developments</i>	17
6	Concluding remarks	17

Marco Bontje

Creating sustainable work locations in European post-suburbia: The Dutch, German and Hungarian experience **21**

1	Introduction	21
2	Urbanisation, employment deconcentration and sustainable regional development	23
2.1	<i>Introduction</i>	23
2.2	<i>Sustainable development: origins, strengths and weaknesses of a development concept</i>	23
2.3	<i>From suburbia to post-suburbia in Europe?</i>	27
2.3.1	<i>North American concepts and experiences and their relevance for Europe</i>	28
2.3.2	<i>Northwest European developments and debates</i>	29
2.3.3	<i>Central and Eastern Europe: 'catching up' or own development path?</i>	31
2.4	<i>Sustainable urban and regional development</i>	32

2.4.1	Sustainable urban regional form	33
2.4.2	Zoning, mixing and multiple space use	34
2.4.3	Sustainable transport	35
2.5	<i>Towards more sustainable work locations in European metropolitan regions</i>	36
3	Research design and methodology	39
3.1	<i>Selection of case studies</i>	39
3.2	<i>The case studies: a short introduction</i>	40
3.3	<i>Research methods: SWOT analysis and semi-structured interviews</i>	41
4	Region Randstad	44
4.1	<i>The Randstad: a short introduction</i>	44
4.2	<i>Sustainability dimensions of employment deconcentration in the Randstad region</i>	47
4.3	<i>Case 1: Hoofddorp-Beukenhorst</i>	48
4.3.1	Local context: Hoofddorp and Schiphol	48
4.3.2	Introducing the case study location: office park Beukenhorst	50
4.3.3	The stakeholders and their views on sustainable development	51
4.3.4	SWOT analysis	54
4.4	<i>Case 2: Almere Poort</i>	56
4.4.1	Local context: Almere	56
4.4.2	Introducing the case study: Almere Poort	57
4.4.3	The stakeholders and their views on sustainable development	59
4.4.4	SWOT analysis	62
5	Region Berlin	65
5.1	<i>Introduction: the Berlin metropolitan region before and after German reunification</i>	65
5.2	<i>Sustainability dimensions of employment deconcentration in the Berlin region</i>	67
5.3	<i>Case study Ludwigsfelde-Brandenburg Park</i>	70
5.3.1	Local context: Ludwigsfelde and Genshagen	70
5.3.2	Introducing the case study: Brandenburg Park	72
5.3.3	The stakeholders and their views on sustainable development	73
5.3.4	SWOT analysis	76
6	Region Budapest	78
6.1	<i>Regional context</i>	78
6.2	<i>Sustainability dimensions of employment deconcentration in the Budapest region</i>	80
6.3	<i>Case studies: Terrapark and Budaörs Industrial and Technology Park</i>	83
6.3.1	Local context: the Budaörs-Törökbalint growth zone	83
6.3.2	Introducing the case studies	85
6.3.3	The stakeholders and their views on sustainable development	86
6.3.4	SWOT analysis	90
7	Conclusions	93
7.1	<i>Comparative SWOT analysis of the five cases</i>	93
7.2	<i>The stakeholders and their views on sustainable development</i>	96
7.3	<i>Are sustainable work locations in post-suburbia possible?</i>	99
